

## Laboratory Technician - Allergy Diagnostics (f/m/x)

We have revolutionized allergy diagnostics and have been operating successfully in more than 90 countries for over 5 years with our diagnostic products and patented technologies. Our products help clarifying allergies in a single step – for humans and animals alike. Allergies are diagnosed in a highly specific manner so that patients receive help by their specialist in no time. We increase quality of life, enable personalized treatment, advance research and relieve our health system.

### We offer:

- A full-time position
- Annual pass for Vienna's public transport and Sodexo vouchers
- Collaboration with people who care about human and veterinary patients alike
- An environment where you feel empowered to ask questions, make requests and offer ideas
- An atmosphere created by the thoughts of sustainability, equity, diversity, inclusion, and mutual respect

### We need you for:

- Preparation of buffer, media and samples
- Filtration, concentration and quality control of samples
- Postprocessing of protein purification experiments
- Documentation, stock tracking and order management
- Support and maintenance of the required equipment

### Your profile:

- Completed education (HTL, Kolleg Rosensteingasse or equivalent) with strong laboratory background
- Accuracy & commitment
- Team spirit
- German proficiency
- At least basic English proficiency
- Nice to have: Practical experience with extract preparation methods (lab- and pilot-scale)

For the cooperation in our team, we offer a payment in line with collective agreement (*Handwerk und Gewerbe*) based on a full-time position. Your actual salary depends on your previous experience and qualifications. Ready to become part of the MADx team? Send us your CV [here](#)!
